Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

Applicant's arguments with respect to claims 13-14 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Chuah et al. (US Patent 6674765).

Regarding claim 13, Chuah et al. disclose a method of transmission in a contention-based access channel by a wireless transceiver, comprising:

a) transmitting a burst in said channel (see fig.4A);

b) detecting whether said burst has collided with another burst in said channel; and when a collision is detected at said detecting step (see fig.14A, element 1404, col.5 lines 19-26), waiting for a period determined according to a repeat parameter (see fig.14A, 1408) before repeating steps a) and b) (see fig.14, elements 1410, 1412), wherein

said repeat parameter is received by said transceiver and wherein said repeat parameter indicates a range waiting period and includes an increment by which said range

waiting period is increased after each repetition of steps a) and b) subsequent collision is detected, whereby said transmission in step a) is increasingly delayed as additional collisions are detected (see col.10 lines 10-19).

Regarding claim 14, Chuah et al. disclose said period is randomly or pseudo-randomly selected from a range indicated by said repeat parameter (see col.10 lines 10-19).

Allowable Subject Matter

Claims 18-19 and 26-27 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent claim 19, the prior art fails to teach “transmitting to each of said plurality of transceivers a forward frequency channel allocation signal indicating an allocation of a forward frequency channel which that transceiver is to receive, wherein each transceiver in said plurality of transceivers is allocated a different forward frequency channel”, as cited in the claim.

Regarding independent claim 26, the prior art fails to teach “transmitting to said first transceiver an allocation signal indicating an allocation in said channel determined according to said predicted demand, wherein said allocation is made independently from a request for allocation by said first transceiver”, as cited in the claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Nguyen whose telephone number is 571-272-7883.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Urban, can be reached at (571) 272-7899. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
